

Creative Technologist — Take-Home Assignment

Dashverse / Frameo Submitted by **Manish Das**

What's in this folder

#	FILE	ASSIGNMENT PART
01	01_Production_Spec.pdf	Part 1 — production spec of the reference ad
02	<u>Four Atoms</u> — watch the video	Part 2 — the video, made for an invented brand
02	02_Video/deviation_notes.md	Part 2 — what I changed from my own spec, and why
03	03_SOP.pdf	Part 3 — handoff instructions
03	workflow/ad-cloner.md	Part 3 §3 — the workflow file the process runs on
03	workflow/prompt_sheet.md	Part 3 §4 — all prompts, copy-pasteable
—	05_screen_recording.mp4	Optional — one unedited run of the workflow

Start with `01_Production_Spec.pdf`, then watch the video, then read `03_SOP.pdf`.

Reference ad analysed in Part 1

Chicnutrix "Glow Advanced" — 45.6 s · 9:16 vertical · 17 shots Public link: [Meta Ad Library](#)

How the video in Part 2 was made

A pipeline that takes a competitor ad as input and rebuilds it for a different brand with a consistent AI-generated presenter. Reference is analysed into a hook / mid / CTA structure, the script is rewritten and normalised, an avatar is locked to a reference sheet, the script is chunked into beats of ≤ 10 s, and each beat is generated as talking-head video and assembled in Premiere Pro through an MCP connection.

Image and video generation: **Higgsfield MCP**. Timeline assembly: **Premiere MCP**. Orchestration: **Claude**, driven by `workflow/ad-cloner.md`.

Full detail in `03_SOP.pdf`.

A note on Part 2 and the invented brand

The workflow is built to rebuild a competitor's *structure* — pacing, shot rhythm, hook mechanics — not its identity. The video submitted for Part 2 uses an invented brand, an invented product name and a generated presenter. No element of the reference brand's identity appears in it: not the name, not the logo, not the packaging, and not the original presenter's likeness.
